

LIVE FEATURE UPDATE

# Real Authentication & Sign-Up Modal Walkthrough

Open Guest Roaming • High-Conversion Auth Modal • Supabase Cloud Sync

## 1. Frictionless Guest Roaming

Visitors can browse all listings (Venice Beach stay, London Eye companion meetup, Mumbai rooftop party, Tokyo food tour) without being forced into an account. SEO and viral social media links work out-of-the-box.

## 2. Intelligent Action Interceptors

When an unauthenticated guest clicks **"Request to Book"**, **"Inquire via Protected Chat"**, or **"Host a Stay"**, the AuthModal immediately pops up with a tailored message.

## 3. Sign-In Features in AuthModal

- **Unified Account:** One login for both Hosts and Travelers. No duplicate portals or accounts needed.
- **Email & Password Sign Up:** Instant validation with auto-creation of a verified profile in your Supabase database in Mumbai.
- **1-Click Google OAuth:** Built directly into the modal for 1-tap browser sign-in.
- **Instant Demo Test Mode:** Includes a quick *"Continue as Demo User"* button so testers can immediately experience the authenticated state.

## 4. Dynamic Navbar States

- **Logged Out (Guest):** Prominent **Log In** and **Sign Up** buttons.
- **Logged In:** Avatar, Name, Verification Tier badge, Role Switcher (Traveler/Host), and Sign Out button.
