

ROAMMEET PLATFORM DOCUMENTATION

Host Dashboard & Traveler “My Trips” User Guide

A complete operational overview of booking requests, address protection, and two-sided marketplace interaction.

1. Overview of the Two-Sided Marketplace Loop

2. Host Dashboard (/host/dashboard)

The Host Hub is designed to give property owners and experience organizers full control over their stays:

Key Features

- **Host Performance Metrics:**
 - **Total Earnings:** Automatically calculated from all confirmed stays.
 - **Pending Requests:** Real-time counter of traveler applications awaiting review.
 - **Active Listings:** Count of experiences currently published and visible on the explore feed.
 - **Host KYC Tier:** Shows verification badge (Tier 1–4) with a direct upgrade link.
- **Booking Requests Management:**
 - **Filter Views:** Easily switch between *All*, *Pending*, *Accepted*, and *Declined* requests.
 - **Traveler Profiles:** View applicant name, avatar, government ID verification badge, location, and member duration.
 - **Stay Details:** Dates, duration, guest count, and personalized introduction note.
 - **Payout Breakdown:** Shows stay subtotal and confirms that the ₹79 / \$1 platform fee is covered by the guest.
 - **Actions:**

- **Accept & Confirm:** Locks in the reservation and instantly reveals the exact address to the traveler.
- **Decline:** Gracefully turns down the booking without penalizing the host.
- **Chat with Traveler:** Opens an instant in-app conversation via `/messages`.
- **My Listings Control:**
 - View all hosted stays and events.
 - **Pause / Resume Toggle:** Temporarily hide a listing from the public feed when fully booked or unavailable, and resume it with one click.
 - Direct links to view the public listing page or create a new experience.

3. Traveler “My Trips” Portal (`/trips`)

The Traveler Hub keeps guests organized and confident about their reservations:

Key Features

- **Reservation Status Tracking:**
 - **Pending Host Approval (🟡):** Informs the traveler that their request has been submitted and that their payment card is not charged until the host confirms. The exact address remains safely hidden.
 - **Confirmed Reservation (🟢):** Clearly displays that the host accepted. **Unlocks the Exact Address** along with neighborhood hints and directions.
 - **Declined (🔴):** Lets travelers know the host was unavailable and invites them to discover alternative stays.
- **Trip Management Tools:**
 - **Direct Host Messaging:** One-click navigation to chat with the host in `/messages`.
 - **Digital Receipt / Invoice:** In-app modal displaying the booking reference number, dates, stay amount, platform guarantee fee, and a print/download button.
 - **Quick Listing Link:** Direct return to the experience details page.

4. Navigation & Role Switching

- **Desktop Navigation:**
 - **“My Trips”** appears with an active trip count badge for logged-in travelers.
 - **“Host Hub”** appears with a pending request alert badge for hosts.
- **Mobile Drawer:**
 - Both portals are accessible directly from the slide-out menu on smartphones and tablets.
- **Smart Redirects:**
 - Submitting a booking prompt includes a **“View in My Trips”** button.
 - Listing owners viewing their own stay have a **“Manage in Host Hub”** shortcut.

5. Security & Privacy Architecture

Built-in Security Protections

- **Contact Guardian Protection:** Private phone numbers, WhatsApp links, and UPI IDs remain protected until the reservation is confirmed.
- **Escrow Guarantee:** Payments are held safely until after check-in, preventing off-platform leakage and ensuring peace of mind for both parties.
- **Cloud Synchronization:** All booking requests and status updates are saved to Supabase (bookings table) and broadcast in real-time across devices.
