

QUICK ACTIVATION • ZERO JARGON

RoamMeet: Supabase Database Setup Guide

Step-by-Step Instructions to Activate Your Free Cloud Database & Link It to the App

✓ Verification Confirmed: Yes, that is the Anon Public Key!

The key starting with **eyJhbGciOi...** is your project's **Anon (Anonymous) Public Key**. It is designed specifically for web browsers and mobile apps to safely connect to your database. Your local configuration file (`.env.local`) has already been automatically configured with it!

PROJECT ID / REFERENCE

ujozwejsvccbqhekszott

CLOUD DATABASE URL

<https://ujozwejsvccbqhekszott.supabase.co>

SERVER LOCATION

South Asia (Mumbai • ap-south-1)

HOSTING TIER & COST

100% Free Tier (\$0/month)

1 Open Supabase SQL Editor in Your Browser

Click this direct link in your browser:

<https://supabase.com/dashboard/project/ujozwejsvccbqhekszott/sql/new>

(Alternatively: on the left-side icon bar of Supabase, click the **SQL Editor** icon `>_``, then click the green **"New query"** button).

2 Paste the Database Schema Script

Paste the complete SQL script into the big text box. This creates all 6 tables and security policies:

TABLE NAME	PURPOSE	FEATURES INCLUDED
profiles	User accounts & KYC status	4-tier badges, ratings, host status
listings	Stays, buddies, parties, activities	Address concealment, pricing, photos
bookings	Reservations & Escrow tally	\$1/₹79 fee recording, date range
messages	Protected real-time chat	Live WebSocket, contact mask flags
kyc_submissions	Aadhaar, Passport, DL documents	Pending/Approved queue for Admin
flagged_audit_logs	Anti-Bypass contact shield logs	Detects phone, email, WhatsApp, UPI

3 Click the Green "Run" Button

Click the green **"Run"** button in the bottom right corner (or press **Ctrl + Enter** on your keyboard).

Within 2 seconds, you will see a message: **✓ Success. No rows returned**.

That means all 6 tables and live subscriptions are created and ready in your cloud database!

4 Next Step: Deploy on Vercel (Your Permanent Live Link)

Once you click Run in Supabase, let me know! We will deploy the app to **Vercel** in 1 command.

You will get a permanent public link (e.g., <https://roammeet.vercel.app>) accessible on every phone, tablet, and computer worldwide 24/7 without needing your laptop turned on.

RoamMeet Platform Documentation • Created for Rohit • 100% Free Cloud Stack (Supabase + Next.js + Vercel)
